

# TABLE OF CONTENTS

---

- 1-6 Mergers, acquisitions and alliances: their impact on the petroleum industry in the next millennium**  
BILL SCHAEFER, JR.
- 7-26 New structural framework for SE Asia, and its implications for the tectonic evolution of NW Borneo**  
KARSTEN M. STORETVEDT, LAP SAU LEONG AND MOHAMMAD ADIB
- 27-49 Tertiary stratigraphy and basin evolution of southern Sabah: implications for the tectono-stratigraphic evolution of Sabah, Malaysia**  
ALLAGU BALAGURU, GARY NICHOLS AND ROBERT HALL
- 51-61 Structural geology of the Neogene Maliau Basin, Sabah**  
F. TONGKUL AND CHANG, F.K.
- 63-75 Sedimentology of the Jalan Salaiman and Bukit Melinsung outcrops, western Sabah: is the West Crocker Formation an analogue for Neogene turbidites offshore?**  
AMELIA G. WILLIAM, JOSEPH J. LAMBIASE, STEFAN BACK AND MOHD. KHALID JAMIRAN
- 77-83 Seismic interpretation of carbonate turbidites in Central Luconia**  
FRANCIS HO, GUENTER JAEGER AND PIET LAMBREGTS
- 85-94 The Pink Fan: a classic deep-marine canyon-fill complex, Block G, NW Sabah**  
COLIN J. GRANT
- 95-103 A dextral strike-slip model for the Miri Structure**  
MUSTAFA KAMAL SHUIB
- 105-126 Deposition of the Tembungo deep-water sands**  
NOOR A'ZIM IBRAHIM
- 127-138 Sequence stratigraphic framework of Northwest Borneo**  
KIM MORRISON AND WONG CHUNG LEE
- 139-152 Depositional history and origin of porosity in a Miocene carbonate platform of Central Luconia, offshore Sarawak**  
VALENTINA ZAMPETTI, WOLFGANG SCHLAGER, JAN-HENK VAN KONIJNENBURG AND ARNOUT-JAN EVERTS
- 153-163 Coaly source rocks of NW Borneo: role of suberinite and bituminite in oil generation and expulsion**  
WAN HASIAH ABDULLAH
- 165-179 Geology of Kinabalu field and its water injection scheme**  
BONIFACE BAIT
